## Testimony from our client

“Dear Wando,

Your team is doing an excellent job for our flights. The permit application is always fast and straight forward - driving our stress down!

The airport ground coordination work is seamless and you have earned a lot of good feedback from our clients. Even for last minute schedule change, your team manages to get everything together for another on-time departure. Good job Team AFM Aviasi Indonesia!

# AFM Aviasi

Permits & Ground Handling

The preferred business aviation ground handler  
Jakarta • Bali • Manado  
Indonesia

# Welcome to AFM!

PT. AFM Aviasi Indonesia (AFM) is a ground handling company that is fully certified by Indonesia Directorate General of Civil Aviation (DGCA) to operate in any airport across Indonesia archipelago. Awarded the operating certificate since 2015, AFM has been focusing on handling business jets.

AFM personnel comprises of experienced business jet operations as well as air charter executives, with tens of years of experiences combined. Personnel are based in Jakarta (WIHH), Bali (WADD) and Manado (WAMM), however we operate nationwide in Indonesia through co-operation with our local handling partners.

We also deploy our personnel where necessary. Either way, we ensure that the handling of your flights go smooth and flawless.

AFM is also a **licensed flight permit agent** in Indonesia. We apply for your flight permits ourselves. This way, we have better control of the process.

## Bali – General Aviation Terminal

The General Aviation Terminal (GAT) is currently the only FBO for private jet passengers in Indonesia.

Previously managed by another company, since March 2017 it has been managed by PT. Angkasa Pura Hotel, the airport operator's subsidiary company. AFM, being a licensed ground handler in Bali, has full access to use this commercial facility.

This FBO charges high terminal fees, but in return you can enjoy the proper private jet passengers facilities.

A **steep discount, 70% off the GAT fee** is offered for aircrafts doing refuelling or technical stops. You can make use of it.
